EDUCATION

STI CALAMBA

Sep 2022 - Present

Bachelor of Science in Information Technology

- **Relevant courses completed:** Game Development, Digital Graphics Design, Programming Languages, Object-Oriented Programming, Computer Graphics Programming, IT Service Management, Network Technology
- **Capstone Project:** Cognify – A Gamified Cognitive Training Application for Filipinos. Designed and implemented 40+ mini-games and built an Android application using Android Studio (Java), with user authentication (login and sign-up) and performance evaluation features.

CAMP VICENTE LIM INTEGRATED SCHOOL

July 2019 - 2021

TVL- Electrical Installation and Maintenance

- **Relevant coursework:** Experienced in residential and commercial electrical wiring installation, troubleshooting and maintenance of electrical systems, and proper handling of electrical tools and equipment.

LEADERSHIP EXPERIENCE

Jan 2025 - Nov 2025

Capstone Leader, STI Calamba

Led a four-member capstone team, overseeing planning, task coordination, and project timelines.

- Served as the sole application developer, responsible for end-to-end development of the Cognify Android app.
- Developed the full application using Android Studio (Java), including 40+ mini-games, user authentication, and performance tracking.
- Contributed to approximately 60% of the overall project documentation, including technical design, system architecture, and implementation details.

INTERNSHIP EXPERIENCE

Feb 2026 - Present

Main Programmer, Municipality of Calamba

Developed a lingkodbayan.ph website and maintained a web-based records management system.

- Served as the main developer for the project, working on frontend form behavior, validation, search filters, database display logic, and Supabase SQL seed/upsert files.
- Added and maintained Create/Read/Update/Delete functionality for Lingkod Bayan records to support easier record management.
